Provider Brief: Signs of Suicide (SOS) Program Update, Lincoln County Health Department, Maternal and Child Health Program

Rebecca Grutsch and Lisa Verity, Lincoln County Health Department and its Maternal and Child Health Program, presented an update regarding the implementation of the Signs of Suicide (SOS) Program with the Elsberry School District. Ms. Grutsch and Ms. Verity explained that the presentation includes a video, from which they facilitate class discussions. Students also complete a screening related to depression and may request to speak with a counselor following the presentation.

The Health Department completed the program with all Elsberry High School students and has scheduled presentations in May for the Elsberry Middle School. Discussions are underway for presentations at the Winfield School District next fall.

The Lincoln County Health Department's Maternal and Child Health Program offers the evidence-based Signs of Suicide program at no cost. Schools have the option of presenting the program themselves, appropriate training provided, or having the Health Department present the materials. Studies have shown that speaking about suicide with youth does not increase the likelihood of incidents. Instead, it helps to identify students who are having suicidal thoughts, which can often be the student no one suspects as the issue of suicide does not discriminate.

D.A.R.T. Report:

Michelle Young announced that D.A.R.T. will meet tomorrow at 9:30 a.m. at the Troy Police Department; they meet monthly on the fourth Thursday. Ms. Young reported that the Winfield School District held their own "Mini Summit," which featured programs from Preferred Family Healthcare and local law enforcement and included timely sessions on topics, such as vaping. D.A.R.T. is currently considering dates for the Addiction Awareness Rally, which will be held in September, and the 2020 Teen Summit to be held in October.

2019 Annual Report of Services and Outcomes

Ms. Winchester announced outcomes from the 2019 Annual Report of Services and Clinical Outcomes, analyzed and compiled by Dr. Cynthia Berry. In 2019, LCRB-funded providers and programs served 1,880 Lincoln County children and youth with direct services, such as counseling, psychiatry, therapeutic mentoring and case management. Additionally, 470 caregivers/adults were supported through LCRB-funded direct services. LCRB-funded prevention programs reached 13,527 Lincoln County children and youth and 1,411 caregivers and adults. Because Lincoln County kids can access multiple programs, such as counseling and classroom prevention programs, we reduce the numbers of totals kids reached (15,407) by 20 percent (3,081) to account for duplication. With this calculation, 12,326 Lincoln County children and youth benefited from 2019 LCRB funded programs and services, or approximately 21 percent of Lincoln County's population.

Report outcomes will be shared by the LCRB via its social media channels.
